

AssetTrack Voyager Mini

The GPX AssetTrack Voyager Mini is a small, discreet tracker that fits in the palm of your hand. This tracker utilizes the largest and most reliable 4G LTE cellular networks to maintain a stable connection to our servers from virtually anywhere in the United States. The device supports real time tracking, with updates as often as every 60 seconds, providing the user with continuous location visibility. By default, the tracker reports every 15 minutes when moving. The Asset Track Voyager Mini features a rechargeable battery, offering up to a week or more of battery life in between charges, depending on the frequency of location updates.
