

## GPX Smart Label

The GPX Smart Label is an ultra-thin, disposable Bluetooth-based shipment tracker that provides crowdsourced location visibility throughout the logistics chain. Activated by tearing along the dotted line, the label begins transmitting location data when in proximity to compatible Bluetooth gateways or smartphones. Designed for simplicity and sustainability, the Smart Label uses an eco-friendly Zn-Mn battery and recyclable materials, offering up to 60 days of operation. Its lightweight, paper-thin form factor makes it ideal for one-way, low-cost tracking applications.

### GENERAL FEATURES

Battery Type	Built-in 20 mAh Zn-Mn (non-replaceable, eco-friendly)
Battery Life	Up to 60 days (usage-dependent)
Activation	Tear-to-start mechanism
Operating Temperature	0°C to 45°C
Material	Waterproof / Thermal Paper
Dimensions	65 x 56 mm (thickness 0.4–1.2 mm)
Weight	4 g
Connectivity	Bluetooth Low Energy (crowdsourced network)
IP Rating	N/A (designed for dry logistics environments)

### CERTIFICATIONS/COMPLIANCE

USA	FCC
